[1] Antal indbyggere i Danmark per 1. juli 2010: 5.543.819 (Kilde: Danmarks Statistik).

[2] *Number of inhabitants in Denmark as of July 1st 2010: 5,543,819 [Source: Statistics Denmark].*

[3] Der er kun medtaget IP-telefoni-abonnementer, der har genereret trafik inden for de seneste tre måneder.

[4] *Only VoIP subscriptions that have generated in- or outbound traffic within the past three months have been included.*

[5] Omfatter tilmeldinger til brug af forvalgskode. Kun forvalgskunder, der har foretaget udgående opkald via frit operatørforvalg inden for de seneste tre måneder, er medtaget.

[6] *Comprises registrations to use carrier selection code. Only registrations that have made an outgoing call through use of carrier selection within the past three months have been included.*

[7] Omfatter trafik fra PSTN/ISDN og IP-telefoni i løbet af halvåret.

[8] *Includes traffic from PSTN/ISDN and IP telephony during the half year.*

[9] Omfatter IP-telefoni-trafik via fastnet og mobil i løbet af halvåret.

[10] *Comprises VoIP- traffic over fixed networks and mobile during the half year.*

[11] Fastnet-internetabonnementer med en downstreamkapacitet på mindst 144 kbit/s.

[12] *Fixed internet subscriptions with a downstream capacity of at least 144 kbit/s.*

[13] Omfatter ikke abonnementer med en downstreamkapacitet under 144 kbit/s.

[14] *Excluding subscriptions with a downstream capacity below 144 kbit/s.*

[15] Omfatter både fiberabonnementer til private og erhverv. Omfatter ikke abonnementer med en downstreamkapacitet under 144 kbit/s.

[16] *Comprises fibre subscriptions to both private (FTTH) and business. Excluding subscriptions with a downstream capacity below 144 kbit/s.*

[17] Inklusive GSM-, UMTS-, CDMA2000-abonnementer, mobil bredbånd og aktive GSM- og UMTS-taletidskort. Et taletidskort anses for aktivt, hvis der har været indgående eller udgående trafik eller reloads af taletidskortet inden for de seneste tre måneder. Eksklusive rene GPRS-abonnementer uden samtidig tale og telemetri-abonnementer.

[18] *Includes GSM, UMTS, CDMA2000 subscriptions, mobile broadband and active GSM, UMTS pre-paid cards. A prepaid card is considered active if there has been inbound or outbound traffic or a reload of the prepaid card in the past three months. Excluding stand alone GPRS subscriptions without voice services and telemetry subscriptions.*

[19] Omfatter mobilabonnementer, der giver mulighed for dataoverførsel med en markedsført/teoretisk downloadhastighed på minimum 256 kbit/s, og som har etableret en internetdataforbindelse i de seneste tre måneder eller har tilknyttet en fast abonnements- eller minimumsbetaling for internetadgang.

[20] *Includes mobile subscriptions that allow data transfer with a advertised/theoretical downstream capacity of minimum 256 kbps and that have established an Internet connection within the last three months or have a fixed subscription payment or a minimum payment for access to data.*

[21] Mobilabonnementer til tale, der har etableret en internetdataforbindelse i de seneste tre måneder, men hvor der ikke foreligger et separat abonnement for adgang til data.

[22] *Mobile subscriptions for voice, that have established an Internet connection within the last three months, but where there are not a separate data subscription.*

[23] Mobilabonnementer til data, der er oprettet i tillæg til et almindeligt mobilabonnement, og som har en fast, separat abonnements- eller minimumsbetaling.

[24] *Mobile subscriptions for data with an add-on data subscription to a voice subscription and that have a fixed subscription payment or a minimum payment for access to data.*

[25] Mobilabonnementer, der udelukkende tillader datatrafik via eksempelvis USB-modem eller datakort til computere. Fra og med første halvår 2010 defineres dedikerede mobile dataabonnementer som abonnementer, der har en markedsført/teoretisk downstreamkapacitet på minimum 256 kbit/s. Den tidligere definition krævede en downstreamkapacitet på minimum 144 kbit/s. Fra og med andet halvår 2009 er definitionen præciseret således, at abonnements- eller minimumsbetaling, eller de skal inden for de seneste 90 dage forud for skæringsdatoen have været anvendt til avancerede datatjenester, forstået som andet end tale, sms og mms. Den præciserede definition har kun haft betydning for meget få udbyderes indberetning.

[26] *Mobile subscriptions that only allow data traffic via for example USB-dongles or data cards for computers. As of the first half of 2010, dedicated mobile data subscriptions are defined as subscriptions with a advertised/theoretical downstream capacity at 256 kbit/s. The previous definition was 144 kbit/s. As of the second half of 2009, the definition has been adjusted so that subscriptions must either have a recurring fee or minimum payment, or been used for advanced data services, understood as anything other than voice, SMS, and MMS within the last 90 days before the 31th of December 2009. The adjusted definition has only affected the reported numbers of very few companies.*

[27] Omfatter trafik fra GSM/UMTS i løbet af halvåret.

[28] *Comprises traffic from GSM/UMTS during the half year.*

[29] Omfatter beskeder sendt via GSM/UMTS i løbet af halvåret.

[30] *Comprises traffic from GSM/UMTS during the half year.*

[31] Mobil datatrafik fra både standard- og tillægsabonnementer samt dedikerede dataabonnementer.

[32] *Mobile data traffic from both standard subscriptions, add-on and dedicated data subscriptions.*

[1] Omfatter kun fastnetabonnementer, der har genereret trafik inden for de seneste tre måneder.

[2] *Comprises subscriptions over fixed network, which have generated traffic within the past three months.*

[3] For at kunne garantere Quality of Service (QoS) skal IP-telefoniudbyderen have kontrol over infrastrukturen. Dette kan enten ske ved, at IP-telefoniudbyderen leverer den internetforbindelse, som IP-trafikken sendes over, og har mulighed for at prioritere IP-trafikken, eller at IP-telefoniudbyderen har en aftale med den operatør, der leverer internetforbindelsen, om, at operatøren garanterer for forbindelsen, så IP-trafikken bliver prioriteret. *In order to guarantee Quality of Service (QoS) the IP Telephony provider must have control over the infrastructure. This can happen in two ways. Either the provider of IP Telephony also provides the connection to the internet, which is used for the IP-traffic, and can prioritize the IP-traffic, or if the VoIP provider has a contract, with the operator who delivers the internet-connection, stating that the operator guarantees that the IP-traffic is prioritized.*

Mobilabonnementer til tale i alt <i>Mobile voice subscriptions in total</i>	6,599,446	6,831,098	6,814,690	3.3%	100.0%	100.0%	100.0%
Heraf taletidskort (GSM og UMTS) [4] <i>Hereof prepaid subscriptions (GSM and UMTS) [5]</i>	1,041,276	1,147,966	1,077,313	3.5%	15.8%	16.8%	15.8%
Dedikerede dataabonnementer [6] <i>Dedicated data subscriptions [7]</i>	418,080	587,317	744,161	78.0%			
Antal mobilabonnementer i alt inklusive dedikerede dataabonnementer <i>Total mobile subscriptions inclusive dedicated data subscriptions</i>	7,017,526	7,418,415	7,558,851	7.7%			

[1] Omfatter GSM-, UMTS-, CDMA2000-abonnementer samt aktive GSM- og UMTS-taletidskort. Et taletidskort anses for aktivt, hvis der har været indgående eller udgående trafik eller reloads af taletidskortet inden for de seneste tre måneder. Eksklusive dedikerede dataabonnementer og telemetri-abonnementer.

[2] Comprises GSM, UMTS, CDMA2000 subscriptions, mobile broadband which also allow speech and active GSM and UMTS pre-paid cards. A prepaid card is considered active if there has been inbound or outbound traffic or a reload of the prepaid card in the past three months. Excluding dedicated data subscriptions and telemetry subscriptions.

[3] Fra og med andet halvår 2009 er A+ Telecoms data inkluderet i Dansk Kabel TV's data.

As of the second half of 2009, data from A+ Telecom is included in Dansk Kabel TV's data.

[4] Omfatter kun aktive taletidskort. Et taletidskort anses for aktivt, hvis der har været indgående eller udgående trafik eller reloads af taletidskortet inden for de seneste tre måneder.

[5] Active pre-paid cards only. A prepaid card is considered active if there has been inbound or outbound traffic or a reload of the prepaid card in the past three months.

[6] Fra og med første halvår 2010 defineres dedikerede mobile dataabonnementer som abonnementer, der har en markedsført/teoretisk downstreamkapacitet på minimum 256 kbit/s. Den tidligere definition krævede en downstreamkapacitet på minimum 144 kbit/s. Fra og med andet halvår 2009 er definitionen præciseret således, at abonnementerne enten skal have tilknyttet en fast abonnements- eller minimumsbetaling, eller de skal inden for de seneste 90 dage forud for skæringsdatoen have været anvendt til avancerede datatjenester, forstået som andet end tale, sms og mms. Den præciserede definition har kun haft betydning for meget få udbyderes indberetning.

[7] As of the first half of 2010, dedicated mobile data subscriptions are defined as subscriptions with a advertised/theoretically downstream capacity at 256 kbit/s. The previous definition was 144 kbit/s. As of the second half of 2009, the definition has been adjusted so that subscriptions must either have a recurring fee or minimum payment, or been used for advanced data services, understood as anything other than voice, SMS, and MMS within the last 90 days before the 31th of December 2009. The adjusted definition has only affected the reported numbers of very few companies.

[2] *Mobile subscriptions for voice, that have established an Internet connection within the last three months, but where there are not a separate data subscription.*

[3] Mobilabonnenter til data, der er oprettet i tillæg til et almindeligt mobilabonnement, og som har en fast, separat abonnements- eller minimumsbetaling.

[4] *Mobile subscriptions for data with an add-on data subscription to a voice subscription and that have a fixed subscription payment or a minimum payment for access to data.*

[5] Fra og med første halvår 2010 defineres dedikerede mobile dataabonnenter som abonnenter, der har en markedsført/teoretisk downstreamkapacitet på minimum 256 kbit/s. Den tidligere definition krævede en downstreamkapacitet på minimum 144 kbit/s. Fra og med andet halvår 2009 er definitionen præciseret således, at abonnenterne enten skal have tilknyttet en fast abonnements- eller minimumsbetaling, eller de skal inden for de seneste 90 dage forud for skæringsdatoen have været anvendt til avancerede datatjenester, forstået som andet end tale, sms og mms. Den præciserede definition har kun haft betydning for meget få udbyderes indberetning.

[6] *As of the first half of 2010, dedicated mobile data subscriptions are defined as subscriptions with a advertised/theoretically downstream capacity at 256 kbit/s. The previous definition was 144 kbit/s. As of the second half of 2009, the definition has been adjusted so that subscriptions must either have a recurring fee or minimum payment, or been used for advanced data services, understood as anything other than voice, SMS, and MMS within the last 90 days before the 31st of December 2009. The adjusted definition has only affected the reported numbers of very few companies.*

[1] Med 'Mobilt bredbånd rene dataabonnement' menes abonnementer med mulighed for dataoverførsel med minimum 144 kbit/s i downstreamkapacitet, som kun tillader datatrafik via eksempelvis USB-dongles eller datakort til computere. Fra og med andet halvår 2009 er definitionen præciseret således, at abonnementerne enten skal have tilknyttet en fast abonnements- eller minimumsbetaling, eller de skal inden for de seneste 90 dage forud for skæringsdatoen have været anvendt til avancerede datatjenester, forstået som andet end tale, sms og mms. Den præciserede definition har kun haft betydning for meget få udbyderes indberetning.

[2] Data-only subscriptions is the number of dedicated data subscriptions enabling data transfer with a minimum of 144 kbit/s downstream capacity and which only allow data traffic over USB dongles or data cards to computers. As of the second half of 2009, the definition has been adjusted so that subscriptions must either have a recurring fee or minimum payment, or been used for advanced data services, understood as anything other than voice, SMS, and MMS within the last 90 days before the 31th of December 2009. The adjusted definition has only affected the reported numbers of very few companies.

[1] Mobilt bredbånd defineres som et mobilabonnement med mulighed for dataoverførsel med bredbåndskapacitet (minimum 144 kbit/s), der inden for de seneste tre måneder før skæringsdatoen har været anvendt på et UMTS-, CDMA2000- eller EDGE-net til avancerede datatjenester eksklusiv tale, sms eller mms.

[2] Med dataabonnenter med mulighed for tale menes abonnenter til mobiltelefoner, som tillader både tale og datatrafik.

[3] Mobile broadband is defined as a mobile subscription that allows data transfer with broadband capacity (minimum 144 kbps) which has been used via UMTS, CDMA2000 or EDGE networks for advanced data services (excluding speech, SMS, or MMS) within the last three months.

[4] Subscriptions which allow voice calls in addition to the exchange of data traffic - subscriptions that use both speech and data on a mobile device.

[1] Fra og med første halvår 2010 defineres dedikerede mobile dataabonnementer som abonnementer, der har en markedsført/teoretisk downstreamkapacitet på minimum 256 kbit/s. Den tidligere definition krævede en downstreamkapacitet på minimum 144 kbit/s. Fra og med andet halvår 2009 er definitionen præciseret således, at abonnementerne enten skal have tilknyttet en fast abonnements- eller minimumsbetaling, eller de skal inden for de seneste 90 dage forud for skæringsdatoen have været anvendt til avancerede datatjenester, forstået som andet end tale, sms og mms. Den præciserede definition har kun haft betydning for meget få udbyderes indberetning.

[2] As of the first half of 2010, dedicated mobile data subscriptions are defined as subscriptions with a advertised/theoretically downstream capacity at 256 kbit/s. The previous definition was 144 kbit/s. As of the second half of 2009, the definition has been adjusted so that subscriptions must either have a recurring fee or minimum payment, or been used for advanced data services, understood as anything other than voice, SMS, and MMS within the last 90 days before the 31th of December 2009. The adjusted definition has only affected the reported numbers of very few companies.

[1] Mobilt bredbånd defineres som et mobilabonnement med mulighed for dataoverførsel med bredbåndskapacitet (minimum 144 kbit/s), der inden for de seneste tre måneder før skæringsdatoen har været anvendt på et UMTS-, CDMA2000- eller EDGE-net til avancerede datatjenester eksklusive tale, sms eller mms.

[2] Med dataabonnementer med mulighed for tale menes abonnementer til mobiltelefoner, som tillader både tale og datatrafik.

[3] Mobile broadband is defined as a mobile subscription that allows data transfer with broadband capacity (minimum 144 kbps) which has been used via UMTS, CDMA2000 or EDGE networks for advanced data services (excluding speech, SMS, or MMS) within the last three months.

[4] Subscriptions which allow voice calls in addition to the exchange of data traffic - subscriptions that use both speech and data on a mobile device.

Types of Internet subscriptions, 2009-2010

Ultimo / End of	Abonnementer / Subscriptions			+/- pct. 1.H.09 - 1.H.10	Markedsandele / Market shares		
	1. H. 2009	2. H. 2009	1. H. 2010		1. H. 2009	2. H. 2009	1. H. 2010
Mobilt bredbånd - Dedikerede dataabonnementer [1] <i>Mobile broadband - dedicated datasubscriptions [2]</i>	418,080	587,317	744,161	78.0%	16.4%	21.4%	25.4%
Fastnet internetabonnementer [3] <i>Fixed internetsubscriptions [4]</i>	2,050,554	2,081,132	2,109,727	2.9%	80.2%	75.8%	72.1%
Dial-up [5]	87,724	77,332	71,095	-19.0%	3.4%	2.8%	2.4%
I alt / In total	2,556,358	2,745,781	2,924,983	14.4%	100.0%	100.0%	100.0%

[1] Fra og med første halvår 2010 defineres mobile bredbåndsabonnementer som abonnementer, der har en markedsført/teoretisk downstreamkapacitet på minimum 256 kbit/s. Den tidligere definition krævede en downstreamkapacitet på minimum 144 kbit/s. Fra og med andet halvår 2009 er definitionen præciseret således, at abonnementerne enten skal have tilknyttet en fast abonnements- eller minimumsbetaling, eller de skal inden for de seneste 90 dage forud for skæringsdatoen have været anvendt til avancerede datatjenester, forstået som andet end tale, sms og mms. Den præciserede definition har kun haft betydning for meget få udbyderes indberetning.

[2] *As of the first half of 2010, mobile broadband subscriptions are defined as subscriptions with a advertised/theoretically downstream capacity at 256 kbit/s. The previous definition was 144 kbit/s. As of the second half of 2009, the definition has been adjusted so that subscriptions must either have a recurring fee or minimum payment, or been used for advanced data services, understood as anything other than voice, SMS, and MMS within the last 90 days before the 31th of December 2009. The adjusted definition has only affected the reported numbers of very few companies.*

[3] Omfatter xDSL, kabelmodem, fiber, faste trådløse internetforbindelser, LAN og øvrige fastnet internetabonnementer på nær dial-up.

[4] *Includes xDSL, cablemodem, fibre, Fixed Wireless Access, LAN, and other fixed internet subscriptions except from dial-up.*

[5] Ved dial-up forstås internetabonnementer via PSTN eller ISDN, der har genereret ind- eller udgående trafik inden for de seneste tre måneder.

Dial-up includes internet subscriptions via PSTN or ISDN that have generated in- or outbound traffic within the past three months.

I alt / In total	2,050,293	2,080,816	2,109,511	2.9%

[1] Downstreamkapacitet på mindst 144 kbit/s.

[2] Minimum downstream capacity of 144 kbit/s.

[3] Alle former for xDSL (Digital Subscriber Line) med downstream-kapacitet på mindst 144 kbit/s.

All types of xDSL (Digital Subscriber Line) with a minimum downstream capacity of 144 kbit/s.

[4] Wireless Local Loop. Trådløs fastnetadgang, fx som faste trådløseforbindelser.

Wireless Local Loop. e.g. as FWA (Fixed Wireless Access).

[5] Wireless Fidelity. Adgang fra en fast adresse via trådløst net baseret på en af 802.11-standarderne.

Wireless Fidelity. Access via wireless net based on one of the standards in the 802.11 family.

[6] Worldwide Interoperability for Microwave Access. Standard for trådløs adgang, som ikke kræver udsyn mellem terminal og basestation.

Worldwide Interoperability for Microwave Access. Standardised wireless access that does not require line-of-sight between terminal and basestation.

[7] Antal husstande i boligforeninger, kollegier m.v. med abonnement på en bredbåndsadgang via et internt lokalnet. Lokalnettet kan være baseret på PDS-kabling eller et trådløst net (WLAN). Den fælles internetforbindelse, som husstandene deler via et internt lokalnet, kan fx bestå af en optisk fiber, faste trådløse forbindelser eller xDSL.

Number of households in residential associations, dormitory etc. with broadband subscription via internal network. The network can be based on either PDS cabling or a wireless network (WLAN). The internet connection that the households share via the local network can be fibre optic cable, FWA, xDSL etc

[8] Andre typer fastnet bredbåndsforbindelser til internet, som for eksempel satellit. *Other types of broadband connections, such as satellite*

Sagitta.dk	4,878	3,631	4,392	-10.0%	4.0%	3.0%	3.4%
YouSee	2,745	698	15	-99.5%	2.3%	0.6%	0.0%
Kollegier / Dormitories [3]	13,051	13,051	24,362	86.7%	10.8%	11.0%	19.0%
Øvrige / Others	7,307	4,159	6,682	-8.6%	6.0%	3.5%	5.2%
I alt / In total	120,792	119,104	128,383	6.3%	100.0%	100.0%	100.0%

[1] Også internetabonnemeter med en markedsført downstreamkapacitet under 144 kbit/s er inkluderet.

Internet subscriptions with an advertised downstream capacity below 144 kbps are also included.

[2] Fra og med andet halvår 2009 er A+ Arrownet og FasComs data inkluderet i Dansk Kabel TV's data.

As of the second half of 2009, data from A+ Arrownet and FasCom's is included in Dansk Kabel TV's data.

[3] Indberetningerne fra kollegierne gennemføres ikke ligeså regelmæssigt, som indberetninger fra teleselskaberne, og kollegiernes samlede antal abonnemeter kan derfor være uændret fra et halvår til et andet. Stigningen i antallet af indberettede LAN-abonnemeter fra 2. H. 2009 til 1. H. 2010 kan i høj grad tilskrives, at der er flere kollegier, der har indberettet data.

[3] Data from dormitories are not collected as regularly as data from telecom companies and the total number of subscriptions from dormitories can therefore be unchanged from one period to the next. The increase in LAN-subscriptions from the second half of 2009 to the first half of 2010 is for a large part due to the fact that more dormitories than previously have reported data.
